INDEX TO ILLUSTRATIONS.

Algol, Light curve of 12
System of, as seen from the earth 70
Astronomical Observatory of the Nantucket Maria Mitchell Association 437
Comet *b* 1911, diagram of orbit 510
drawing by *Luis G. Leon* 509
photographs taken at the Lick Observatory, Plate XV ..... Op. 510
c 1911, photographs by *H. D. Curtis* and *C. C. Kiess*, Plates XXVII, XXVIII and XXIX ..... Op. 648, 650
f 1911, Quenissett, diagram of orbit 572
g 1911 Beljawsky, diagram of orbit 574
Drawing by *Luis G. Leon*, Plate XXI ..... Op. 575
Photograph by *H. D. Curtis*, Plate XXIX ..... Op. 650
Conjunction of Mars, Saturn and the Moon 1911, Aug. 16, photograph by *E. E. Barnard*, Plate XIV ..... Op. 464
Curves of zero velocity (Darwin) 422, 543
Diagram of field of R and RT *Cygni* 132
S *Canis minoris* 134
T *Herculis* 135
U *Herculis* 136
R *Ophiuchi* 137
R *Ursae majoris* 138
Dome of St. Peter's from the wall of the Vatican Observatory 562
Eclipse of the Sun April 28, 1911, diagrams 98, 99
Ericsson's first sun engine 154
improved sun motor 155
Evolution of the starry heavens, Frontispiece, Plate XVI ..... Op. 529
Foreign visitors to the August, 1910, meeting of the Astronomical and Astrophysical Society of America, Plate I ..... Op. 1
Galvanometer and accessories for selenium photometer 6
Geminids of 1910, *Robert M. Dole* 120
Halley's comet, March 19, 1911, photograph by *F. Slocum*, Plate X ..... Op. 261
Herschel's 40-foot telescope 473
Hipparchus 535
Illustration of the possible function of disruptive approach in forming spiral nebulæ 24
Impact of stars 23
Light curve of S *Canis minoris* 139
R *Cygni* 140
U *Herculis* 141
u Herculis 250
Locometer, The 384

Lord Rosse's great six-foot reflecting telescope..... 474
McFarland, R. W., 1825-1910, Plate VIII.....Op. 195
Maria Mitchell, Birthplace of..... 436
Mars as seen with an 11-inch reflector, *Latimer J. Wilson,* Plate XXVI..Op. 627
Melbourne 4-foot reflector..... 472
Members of the Astronomical and Astrophysical Society of America at the August, 1910, meeting at Harvard College Observatory, Plate III...Op. 65
Meteorological Observatory on Mount Teneriffe, Plate VII.....Op. 129
Milky Way in *Scutum,* photographed by *A. Rordame,* Plate XX.....Op. 564
Millikan, R. A..... 609
Apparatus by which he isolated an ion..... 610
Mitchell, Maria, Plate XIII.....Op. 433
Moon, eight days old, Plate XVIII.....Op. 544
photographed by *Luis G. Leon,* Dec.12 1910..... 122
MM Loewy and *Puiseux,* Plate IX.....Op. 218
MM Loewy and *Puiseux,* Plate XI.....Op. 327
Mouchot's sun engine..... 156
Nova Lacertæ, photograph of the region about, by *H. D. Curtis,* PlateIV .....Op. 81
photographs of the spectrum of, by *W. H. Wright,* Plate V .....Op. 83
Orbit of Holden 60..... 18
Perseids, Aug. 11, 1911..... 628
Photograph of Brooks' comet *c* 1911, by *A. Rordame,* Plate XIX.....Op. 563
Poincaré, Plate XVII.....Op. 530
Proposed open-air refracting telescope..... 478
Region around Alpha *Cygni,* photographed by *A. Rordame,* Plate XX....Op. 564
Centaurus and *Crux*..... 381
Riefler clock system of the Cincinnati Observatory.....345, 346, 347
Selenium cell by Giltay..... 2
in ice pack attached to 12-inch refractor..... 5
Solar rotation work at the Mount Wilson Solar Observatory, Plate VI...Op. 92
system 630
Relative diameters and distances..... 631
Spiral Nebula, M 101 *Ursa Major,* Plate II.....Op. 20
Splashes, *Arthur M. Worthington*..... 288
Sun motor at Pasadena, California..... 158
Sun-Earth model, *Joseph F. Morse*..... 235
Telescope, 40-inch, of the Yerkes Observatory..... 477
Tesla's sun motor..... 160
Typical great telescope of the 17th century..... 475
Weston's thermo-electric sun motor..... 157
Zeiss ultra violet camera of Yerkes Observatory..... 599

GENERAL INDEX TO VOLUME XIX.

Absorption of the light of the stars by meteorites..... 323
Abstracts of papers presented at the Ottawa meeting of the A. A. S. A..... 591
Adjusting the polar axis of an equatorial telescope, A simple method, *Frank Schlesinger* 559
Aitken, R. G., Notes on the earthquake of July 1, 1911..... 460
Albedo of clouds..... 591
Algol, The measurement of the light of stars with a selenium photometer, with an application to the variations of, *Joel Stebbins*.....1, 65
Alpha hydrogen in the star D. M. +30°3639, *Monroe B. Snyder*..... 233
American association of variable star observers, first monthly report, *W. T. Olcott*..... 655
Ames, C. H., Are space and time infinite?..... 31
Anti-cyclones, An hypothesis of the origin of, *W. F. Carothers*..... 299
Are space and time infinite? *C. H. Ames*..... 31
Asteroid, A remarkable..... 651
Asteroids, A favorable opportunity for the amateur to find, *Ruel W. Roberts* 59
Further considerations on the origin of the zone of, *T. J. J. See*.. 275
Numbering of recently discovered..... 578
1909 HZ (690), elements and ephemeris..... 108
1909 JA, elements and ephemeris..... 453
1909 JB, elements..... 109
1910 KU, new elements and ephemeris..... 109
(395) Delia, Ephemeris of..... 368
Astronomical and Astrophysical Society of America, preliminary program... 458
added papers 589
circular of information 660
discovery, The next great..... 191
fellowship of the Nantucket Maria Mitchell Association..... 589
investigations of the Carnegie Institution..... 323
phenomena in 1911..... 47
Society Dayton 651
Society of Pittsburg..... 257
Society of Spain..... 323
Atkinson, H. N., How the planets are warmed by the sun..... 318
Atlas stellarum variabilium, *Hagen's*..... 64
Aurora Borealis, Audibility of, *Charles Caverno*..... 453
A year on Mount Hamilton, *M. Yamasaki*..... 493
Barnard, E. E., The conjunction of Mars and Saturn, 1911, Aug. 16..... 498
Barnes, Willis L., A method of identifying the satellites of Saturn..... 86
Bartlett, Arthur K., Celestial photography..... 147
The Harvest Moon..... 13

Barton, Samuel G., Does the Moon "fall" toward the earth?..... 187
Brooklyn Institute elections..... 392
Bouton, Tilton C. H., An interesting occultation..... 386
Campbell, Frederic, February as an anniversary month..... 80
Vagaries of the moon..... 406
Campbell, W. W., The D. O. Mills expedition to the southern hemisphere... 84
Capture of satellites, *T. J. J. See*..... 422
Professor E. W. Brown's verification of the, *T. J. J. See*..... 422
Carothers, W. F., An hypothesis of the origin of anti-cyclones..... 299
Caverno, Charles, Audibility of the Aurora borealis..... 453
Celestial Photography, *Arthur K. Bartlett*..... 147
with ordinary portrait lenses, *A. Rordame*..... 563
Centaurus and Crux, Notes on, *Bernard Thomas*..... 379
Changes in collimation and level of the Ottawa meridian circle, *R. M. Stewart* 661
Cincinnati astronomical society..... 386
Clouds, The albedo of..... 591
Comet and Asteroid notes.....108, 180, 246, 310, 368, 447, 508, 648
Encke's periodic 513
Halley's, dimensions 651
Halley's, observing, from the summit of Mount Whitney..... 578
Recent photographs of..... 451
The romance of its past, *Irene E. Toye Warner*..... 103
Wolf's periodic 447
ephemeris 181, 246, 448
1852 IV, Westphal, search ephemeris for, *F. E. Seagrave*..... 246
1892 V, Barnard, search ephemeris..... 451
1893 I, Brooks, definitive orbit..... 509
1905 II, Borrelly, rediscovered..... 513
elements and ephemeris..... 576
a 1910, photograph by *Karl Bohlin*, Plate XII.....Op. 393
b 1910, Metcalf, ephemeris..... 369
c 1910, Cerulli-Faye, second elements..... 109
ephemeris 180
b 1911, Kiess.....448-450
diagram of orbit 510
elements 510, 576
ephemeris 510, 577
photographs of 510
spectrum 450
c 1911, Brooks, diagram of orbit..... 511
discovery 451
elements, *R. K. Young*..... 512
ephemeris 513, 577, 649
increase in brightness..... 648
photographs taken at the Lick Observatory..... 648
e 1911, Borrelly's ephemeris..... 649
f 1911, Quenisset, diagram of orbit..... 572
ephemeris 573, 650

g 1911, Beljawsky, discovery....573, 579
diagram of orbit.... 574
drawing by *Luis G. Leon*.... 575
elements and ephemeris....574, 576, 650
photograph by *H. D. Curtis*.... 648
Comets, Photographs of.... 648
Cometary object, A swift moving.... 508
statistics, *H. C. Wilson*.... 143
Comets, concerning the physical constitution of.... 310
Communications, questions and answers...59, 119, 186, 318, 378, 453, 514, 579, 651
Computation of the times of rising and setting of the moon, *Albert S. Flint* 261, 363
Conjunction of Mars and Saturn, 1911, Aug. 16, *E. E. Barnard*.... 498
Herman Fritz 514
Contribution of Astronomy to general culture, *Edwin B. Frost*.... 463
Co-operative astronomy 258
"Coronium," The nature of, in sun and star, *Monroe B. Snyder*.... 170
Creation story in the light of modern astronomy, *Hector Macpherson, Jr*.... 426
Curtis, Harold B., Seeing stars in the daytime.... 163
Venus visible at conjunction.... 514
Curtis, Heber D., Methods of silvering mirrors....327, 398
Photograph of the region about *Nova Lacertae*, Plate IV.. 81
Photographs of Comet *c* 1911.... 648
Recent photographs of Halley's comet.... 451
Curtiss, R. H., Extra papers added to the program of the Ottawa meeting.... 589
Davis, W. H., Discovery of comet *g* 1911.... 579
Daylight occultation of σ Sagittarii.... 124
Dayton astronomical society....387, 651
Dean, John Candee, The universe a mechanism.... 19
Distribution of the stars in space, *H. C. Wilson*.... 42
Dixcy, Thomas Bird, An inquiry into a certain application of the theory of probabilities 337
Dole, Robert M., The Geminids Dec. 12, 1910.... 119
The Perseids 1911.... 627
Doolittle, Eric, Dr. See's new theory of stellar and planetary evolution..... 35
Double stars, New, *E. D. Roe, Jr*....383, 589
orbit of Holden 60, B. G. C. 12696, *Philip Fox*.... 17
Duerler, Gus A., Jr., The equatorial belt on Saturn.... 189
Early, Chas. L., A new sundial.... 384
Earthquake shock at Lick Observatory.... 459
Notes on the earthquake of July 1, 1911, *R. G. Aitken*.... 460
Earth's radiation zones.... 592
Easter formula, A new.... 260
Eclipse of the moon, Nov. 16, 1910, *Winslow Upton*.... 59
Effective diameters of the stars.... 258
Emanuelli, Dr. Pio, The total solar eclipse of 1911, April 28.... 171
Evolution of the starry heavens, *T. J. J. See*....529, 612
Fath, Edward A., The visibility of Venus by daylight.... 30
February as an anniversary month, *Frederic Campbell*.... 80
Fellowships, The Martin Kellog.... 391

Flint, Albert S., The computation of the times of rising and setting of the moon 261
Addendum 363
Fosdick, R. E., The Dayton astronomical society 651

Valle, Felipe, Life and work of 123
Variable, δ Cephei type of, A review of some theories advanced in explanation, *Psyche Rebecca Sutton* 408
Variable star association 586
First monthly report 655
observations 656, 657
work for the amateur with a small telescope, *William Tyler Olcott* 129
Variable stars 53, 110, 181, 248, 312, 370, 439, 504, 567, 641
Approximate magnitudes 54, 114, 182, 248, 252, 372, 441, 504, 567, 641
Betelgeuse, the brightness of, *Joel Stebbins* 659
Coöperation in observing 520
Designation of recently discovered 112
elements of, *Sigurd Enebo* 647
Maxima of short period variables 57, 118, 183, 256, 316, 375, 445, 506, 569, 644
Minima of variables of the Algol type 56, 116, 185, 254, 314, 372, 441, 504, 568, 642
Methods of observing 521
of the δ *Cephei* type 251
Periods of, in the small Magellanic cloud, *Henrietta G. Leavitt* 661
Polaris as a variable star 571
The Astronomische Gesellschaft catalogue of 252
135.1910 *Andromedae* 181
18.1911 *Aurigae* 440
RW *Camelopardalus,* New elements 370
3.1911 *Cancri* 182
